£150 available per school
(limited funding available)

National Curriculum Links:
Design Technology,
Science & Maths

As well as developing an understanding of how these skills are used in the wider community. Further benefits include teamwork, problem solving and communication.

In 2019-20 over 50 schools took part in the Worcestershire Primary STEM Challenge. Now entering its fourth year, the competition aims to be bigger and better.

This exciting initiative will inspire the next generation of engineers to drive the future economy of Worcestershire and beyond. Throughout the challenge, students will learn about structures and mechanisms, and use their knowledge to solve a local construction challenge. Worcestershire LEP and Worcestershire County Council remain committed to supporting schools in this exciting opportunity through the sponsoring of the Primary STEM Challenge.

STEMworks will be visiting schools from September onwards to deliver a half day workshop for up to 36 KS2 students, where one team will be chosen to represent your school at the final (format yet to be confirmed). To take part in this exciting challenge, please complete the attached registration form and return it to STEMworks.
